

Evergreen Underground
Water Conservation District

METER ASSISTANCE

EUWCD are able to assist irrigation well permit holders with the cost of a purchase of a meter through an Agricultural Water Conservation Grant from the Texas Water Development Board. The intent of the grant is to assist existing irrigation well permit holders in the District in the purchase of in-line volumetric flow meters for existing irrigation wells and systems.

Our staff will be available to assist the landowner in the proper meter selection as well as proper placement in the piping system.

REQUIREMENTS

- Active Permit
- Annual Production Reporting
